

E-Commerce API - Postman Test Suite Evidence Report

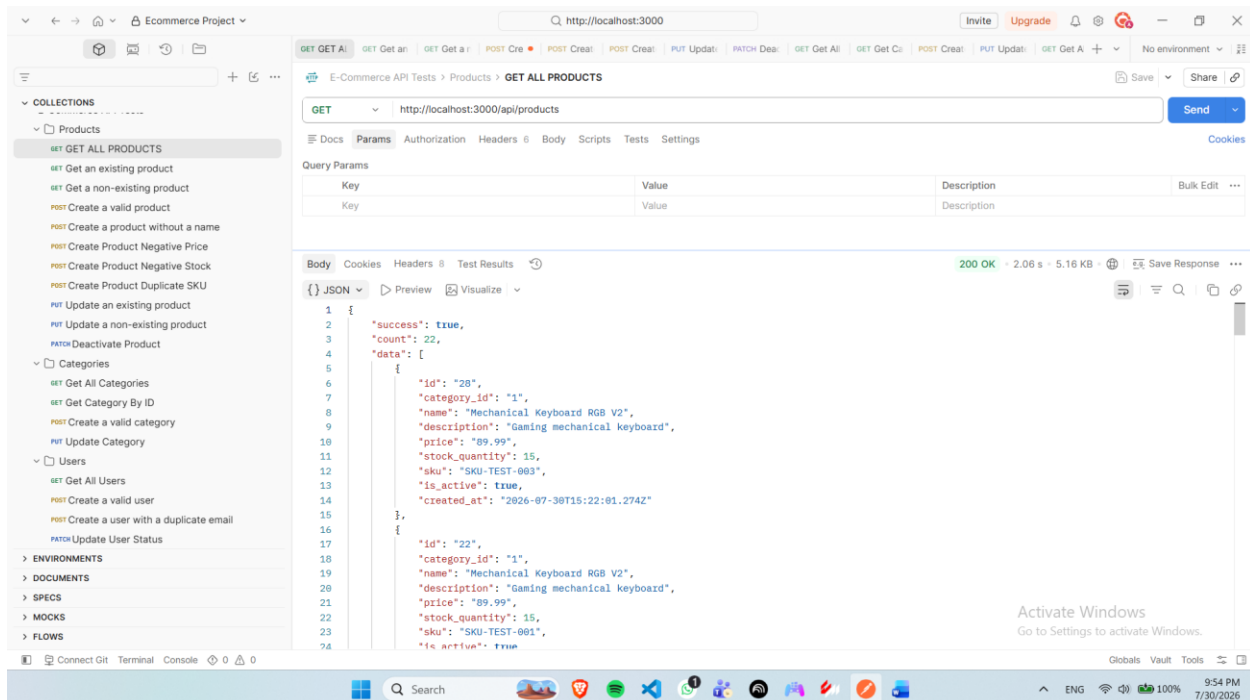

GitHub repo: <https://github.com/AmroZaid/Complete-E-Commerce-API.git>

Date: 7/30/2026

الاسم : عمرو زيد عبد الحميد المحيسن

1. Get All Products

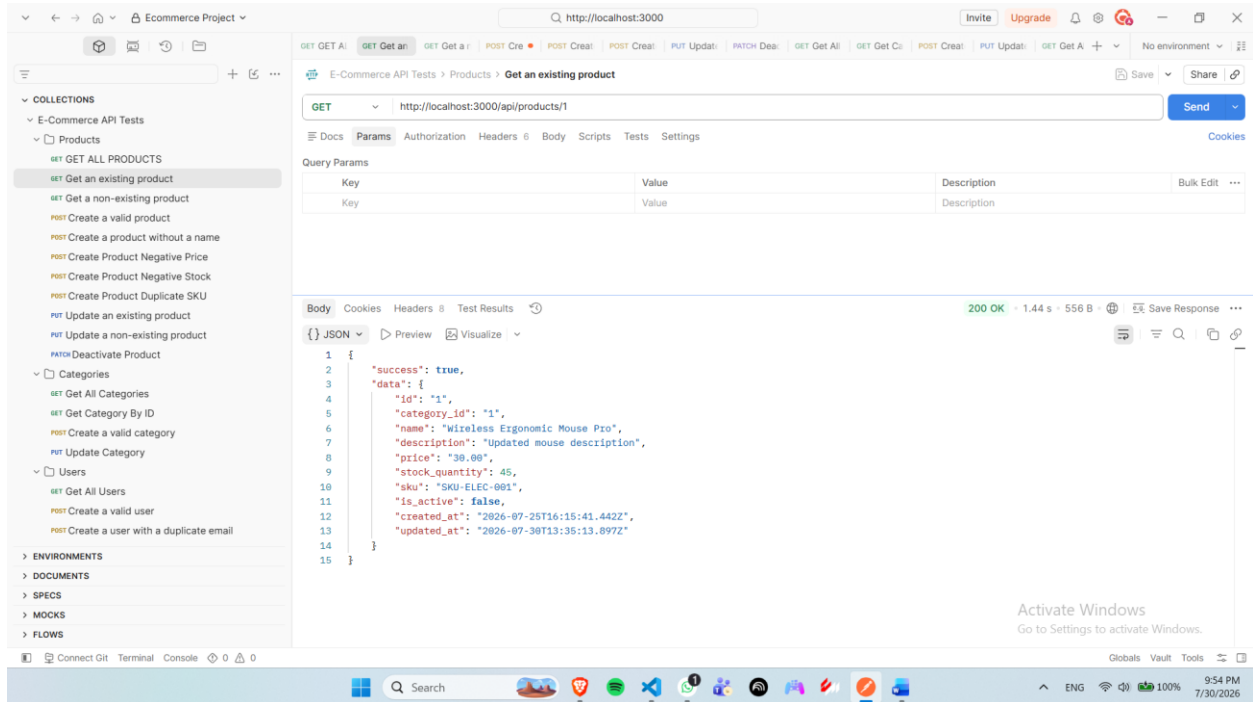

- **Method & Route:** GET /api/products
- **Request Body:** None
- **Expected Status Code:** 200 OK
- **Actual Status Code:** 200 OK
- **Response Body:** Array of all product objects
- **Confirmation Statement:** Actual result (200 OK) matches expected result (200 OK).

2. Get an existing product

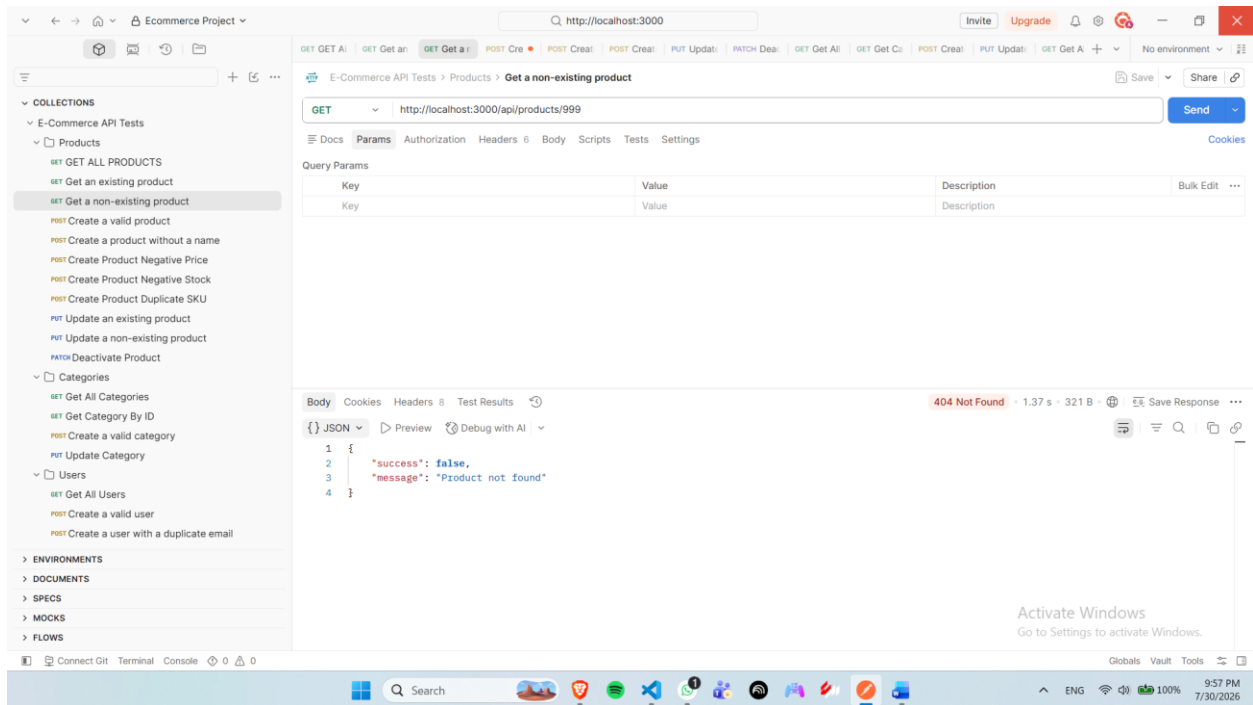

- **Method & Route:** GET /api/products/1
- **Request Body:** None
- **Expected Status Code:** 200 OK
- **Actual Status Code:** 200 OK
- **Response Body:** Single product object matching ID 1

- **Confirmation Statement:** Actual result (200 OK) matches expected result (200 OK).

3. Get a non-existing product

- **Method & Route:** GET /api/products/999
- **Request Body:** None
- **Expected Status Code:** 404 Not Found
- **Actual Status Code:** 404 Not Found
- **Response Body:** {"success": false, "message": "Product not found"}
- **Confirmation Statement:** Actual result (404 Not Found) matches expected result (404 Not Found).

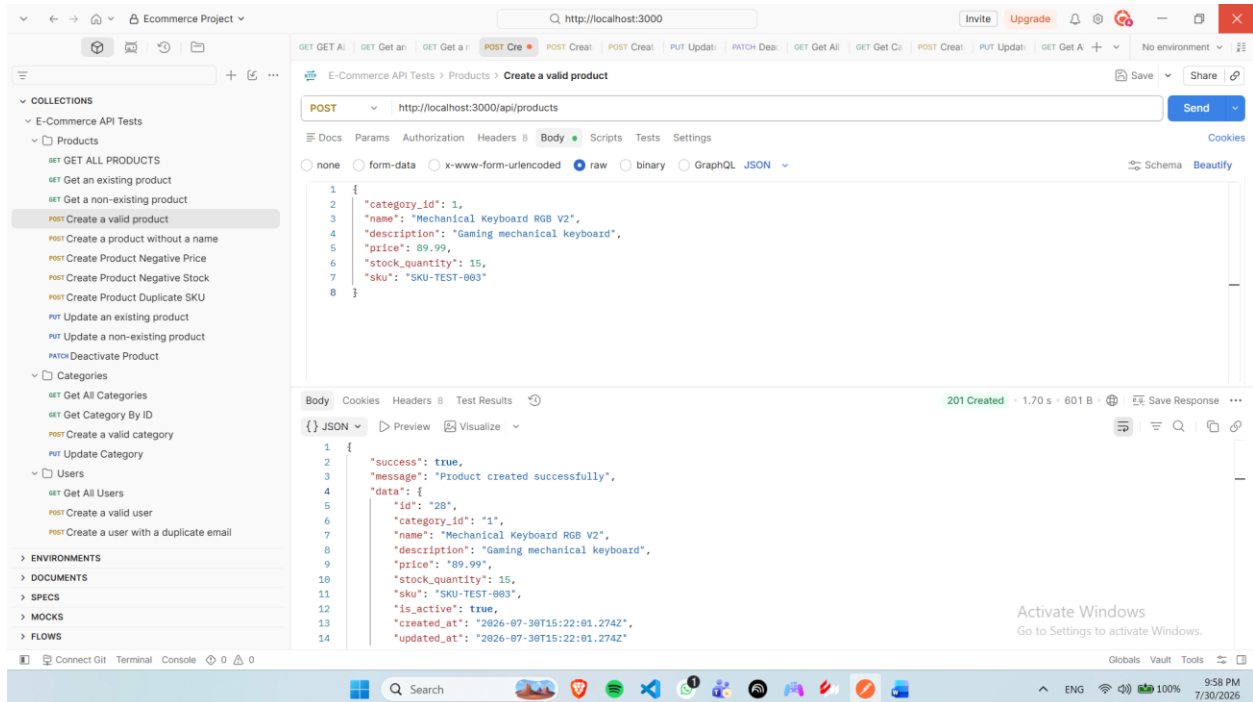

- **4. Create a valid product**
- **Method & Route:** POST /api/products
- **Request Body:**

JSON

```
{  
  "category_id": 1,  
  "name": "Mechanical Keyboard RGB V2",  
  "description": "Gaming mechanical keyboard",  
  "price": 89.99,  
  "stock_quantity": 15,  
  "sku": "SKU-TEST-001"  
}
```

- **Expected Status Code:** 201 Created
- **Actual Status Code:** 201 Created

- **Response Body:** {"success": true, "message": "Product created successfully", "data": {...}}
- **Confirmation Statement:** Actual result (201 Created) matches expected result (201 Created).

5. Create a product without a name

- **Method & Route:** POST /api/products
- **Request Body:**

JSON

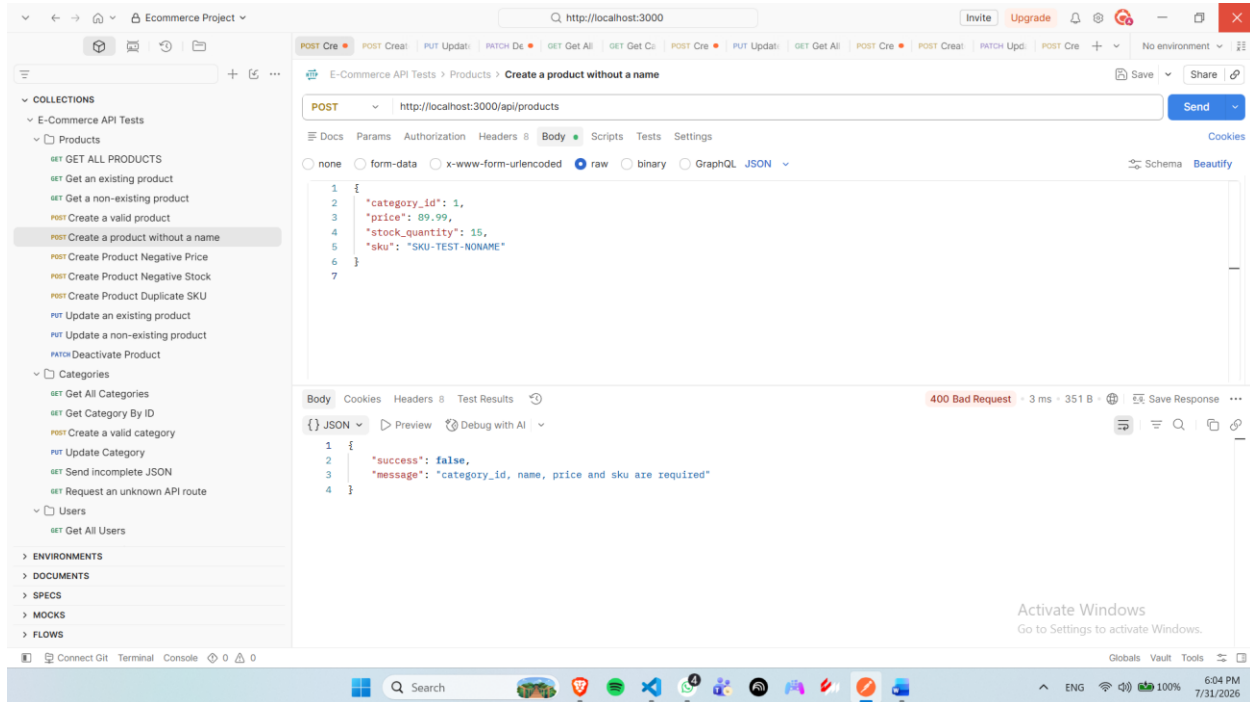

```

{
  "category_id": 1,
  "price": 89.99,
  "stock_quantity": 15,
  "sku": "SKU-TEST-NONAME"
}

```

- **Expected Status Code:** 400 Bad Request
- **Actual Status Code:** 400 Bad Request

- **Response Body:** {"success": false, "message": "Product name is required"}
- **Confirmation Statement:** Actual result (400 Bad Request) matches expected result (400 Bad Request).

6. Create Product Negative Price

- **Method & Route:** POST /api/products
- **Request Body:**

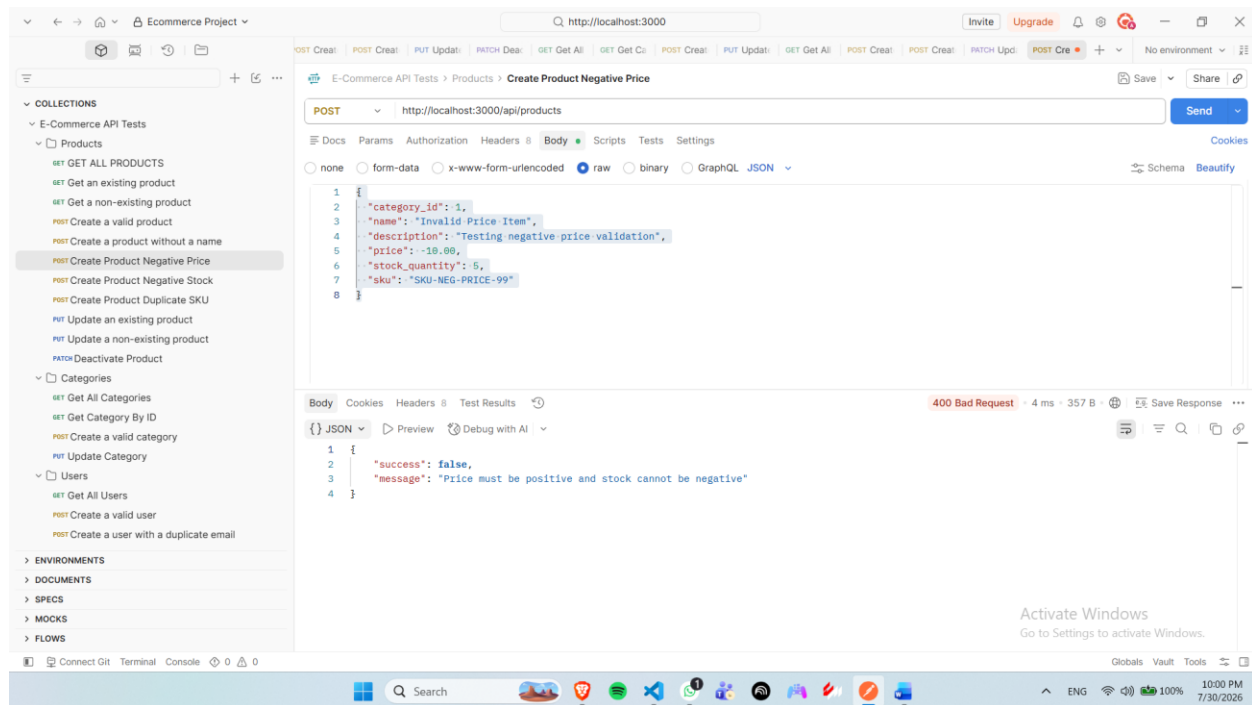

JSON

{

- "category_id": 1,
- "name": "Invalid Price Item",
- "description": "Testing negative price validation",
- "price": -10.00,
- "stock_quantity": 5,
- "sku": "SKU-NEG-PRICE-99"

}

- **Expected Status Code:** 400 Bad Request
- **Actual Status Code:** 400 Bad Request
- **Response Body:** {"success": false, "message": "Price must be a positive number"}
- **Confirmation Statement:** Actual result (400 Bad Request) matches expected result (400 Bad Request).

7. Create Product Negative Stock

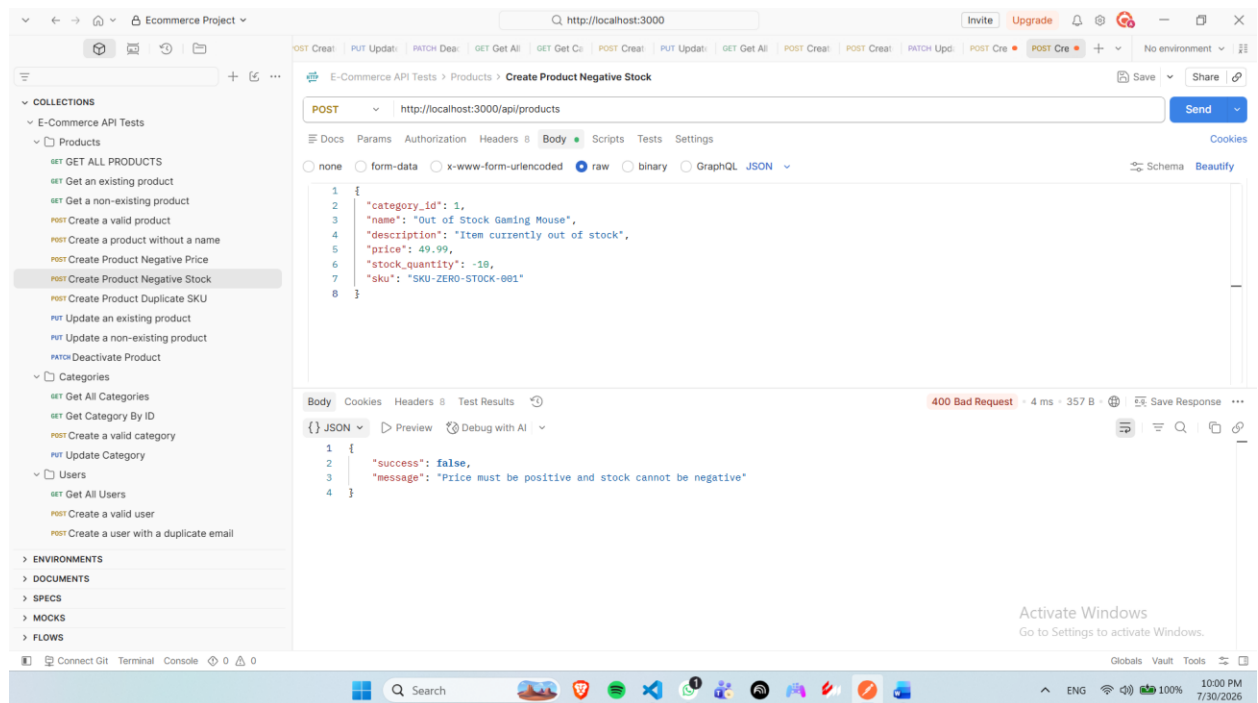

- **Method & Route:** POST /api/products
- **Request Body:**

JSON

```
{
  "category_id": 1,
  "name": "Invalid Stock Item",
  "price": 25.00,
  "stock_quantity": -5,
```

```
"sku": "SKU-NEG-STOCK"
}
```

- **Expected Status Code:** 400 Bad Request
- **Actual Status Code:** 400 Bad Request
- **Response Body:** {"success": false, "message": "Stock quantity cannot be negative"}
- **Confirmation Statement:** Actual result (400 Bad Request) matches expected result (400 Bad Request).

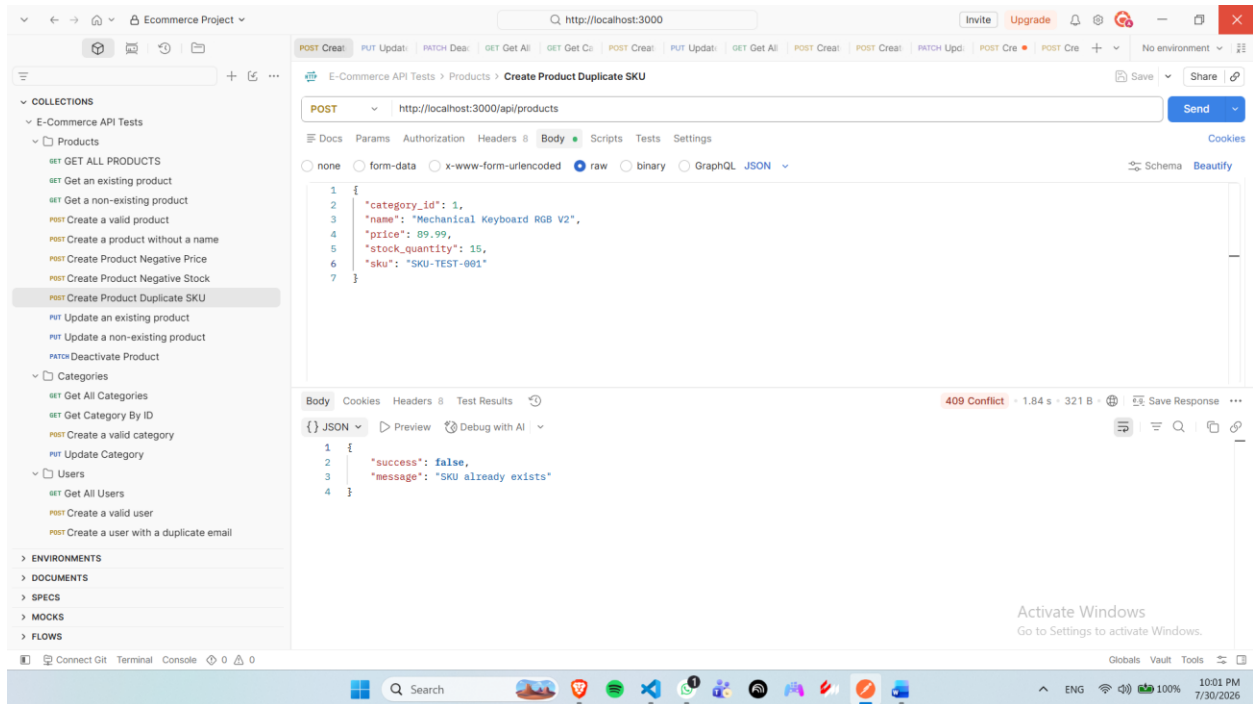

- **8. Create Product Duplicate SKU**
- **Method & Route:** POST /api/products
- **Request Body:**

JSON

```
{
  "category_id": 1,
  "name": "Duplicate SKU Item",
  "price": 89.99,
```

```
"stock_quantity": 15,  
"sku": "SKU-TEST-001"  
}
```

- **Expected Status Code:** 409 Conflict
- **Actual Status Code:** 409 Conflict
- **Response Body:** {"success": false, "message": "Product with this SKU already exists"}
- **Confirmation Statement:** Actual result (409 Conflict) matches expected result (409 Conflict).

- **9. Update an existing product**
- **Method & Route:** PUT /api/products/1
- **Request Body:**

JSON

```
{  
  "category_id": 1,  
  "name": "Wireless Ergonomic Mouse Pro",
```

```

"description": "Updated description",

"price": 30.00,

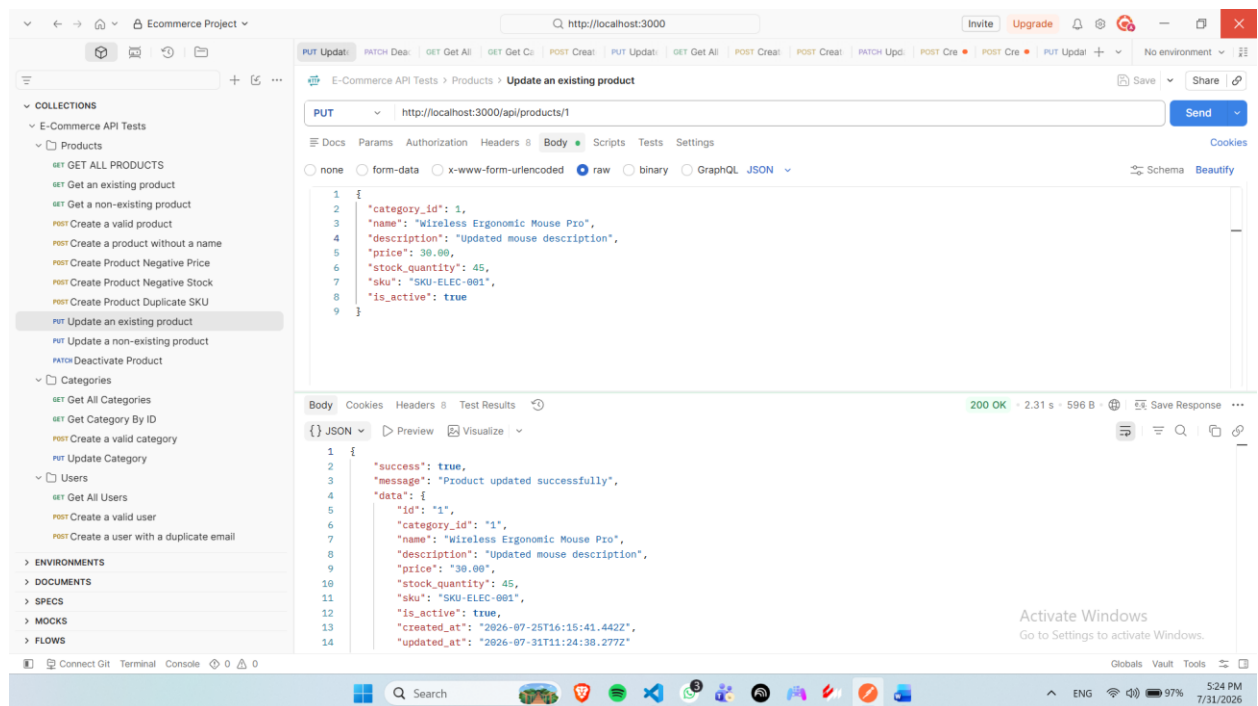

"stock_quantity": 45,

"sku": "SKU-ELEC-001",

"is_active": true
}

```

- **Expected Status Code:** 200 OK
- **Actual Status Code:** 200 OK
- **Response Body:** {"success": true, "message": "Product updated successfully"}
- **Confirmation Statement:** Actual result (200 OK) matches expected result (200 OK).

10. Update a non-existing product

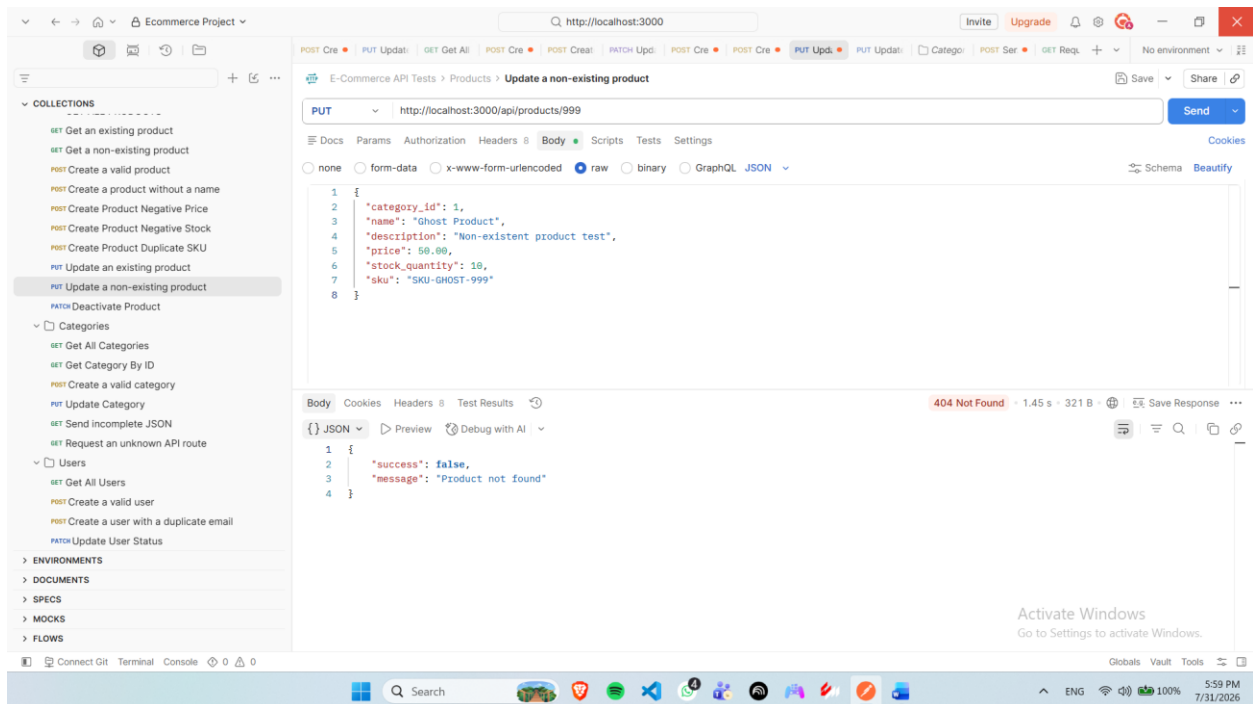

- **Method & Route:** PUT /api/products/999
- **Request Body:**

JSON

```
{
```

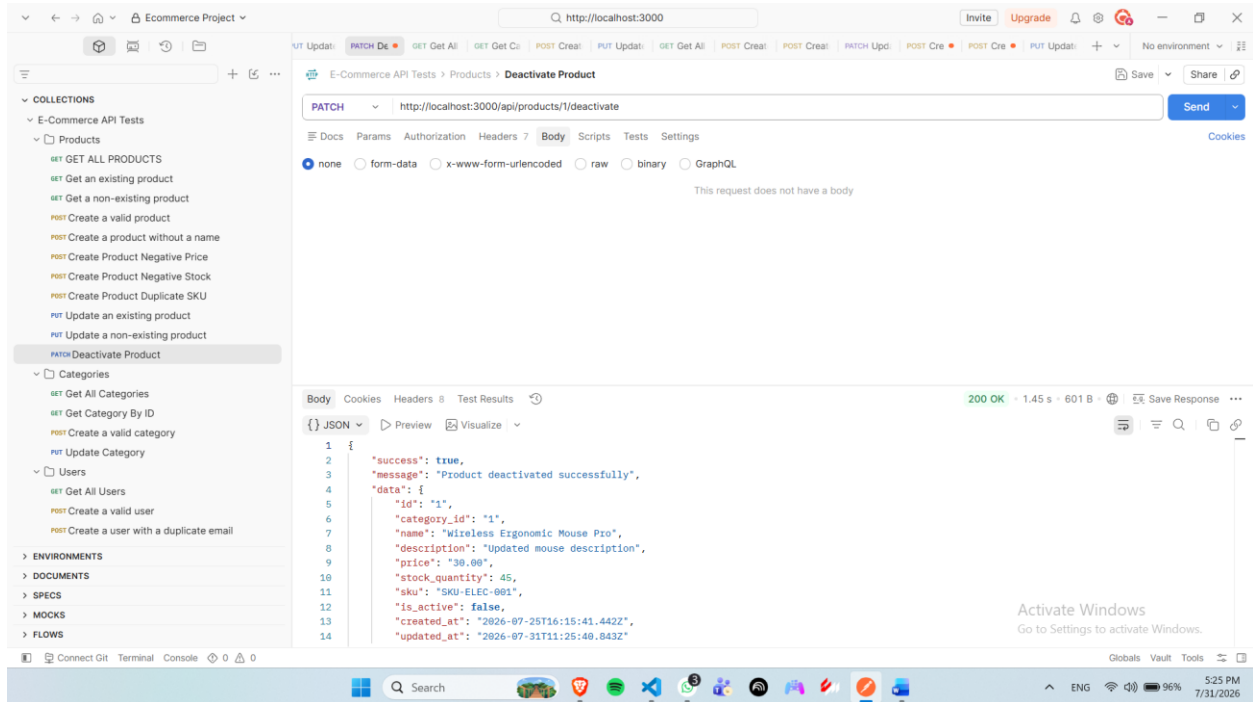

```
"category_id": 1,  
"name": "Ghost Product",  
"description": "Non-existent product test",  
"price": 50.00,  
"stock_quantity": 10,  
"sku": "SKU-GHOST-999"  
}
```

- **Expected Status Code: 404**
- **Actual Status Code: 404 Not Found**
- **Response Body: {"success": false, "message": "Product not found"}**
- **Confirmation Statement: Actual result (404 Not Found) matches expected result (404).**

- **11. Deactivate Product**
- **Method & Route: PATCH /api/products/1/deactivate**
- **Request Body: None**

- **Expected Status Code:** 200 OK
- **Actual Status Code:** 200 OK
- **Response Body:** {"success": true, "message": "Product deactivated successfully"}
- **Confirmation Statement:** Actual result (200 OK) matches expected result (200 OK).

12. Create a valid category

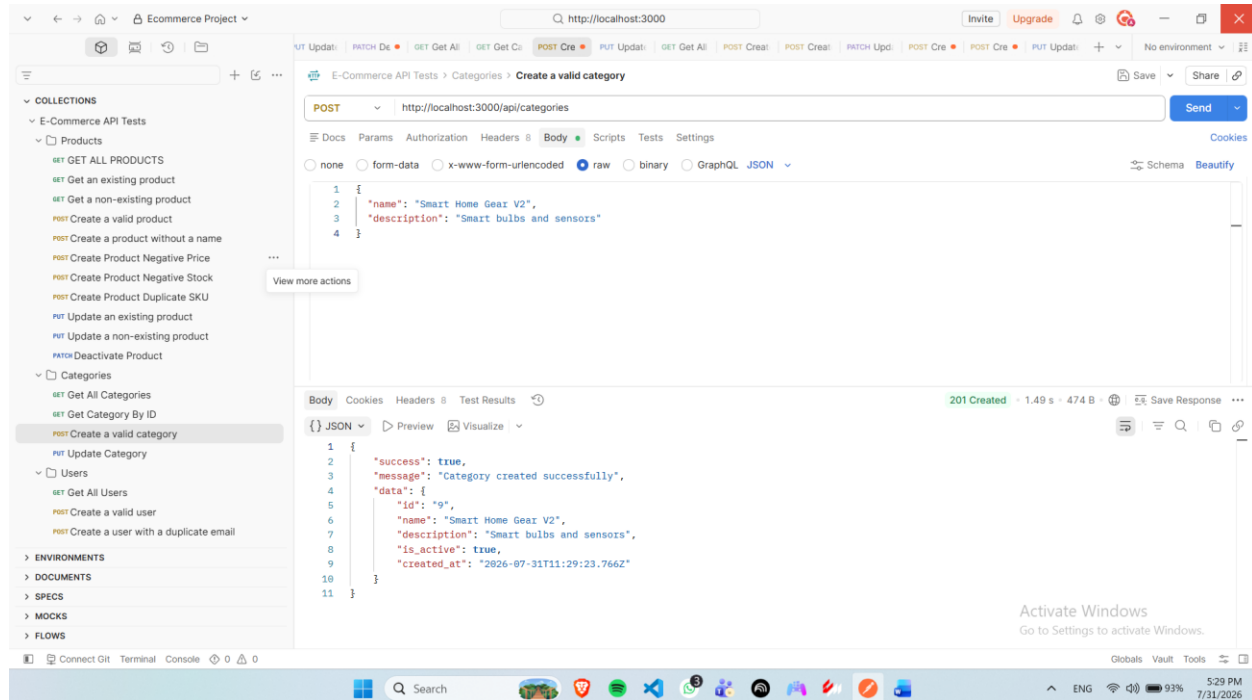

- **Method & Route:** GET /api/categories
- **Request Body:**

JSON

```
{
  "name": "Smart Home Gear V2",
  "description": "Smart bulbs and sensors"
}
```

- **Expected Status Code:** 201 Created
- **Actual Status Code:** 201 Created
- **Response Body:** Array of category objects

- **Confirmation Statement:** Actual result (201 Created) matches expected result (201 Created).

13. Create a valid user

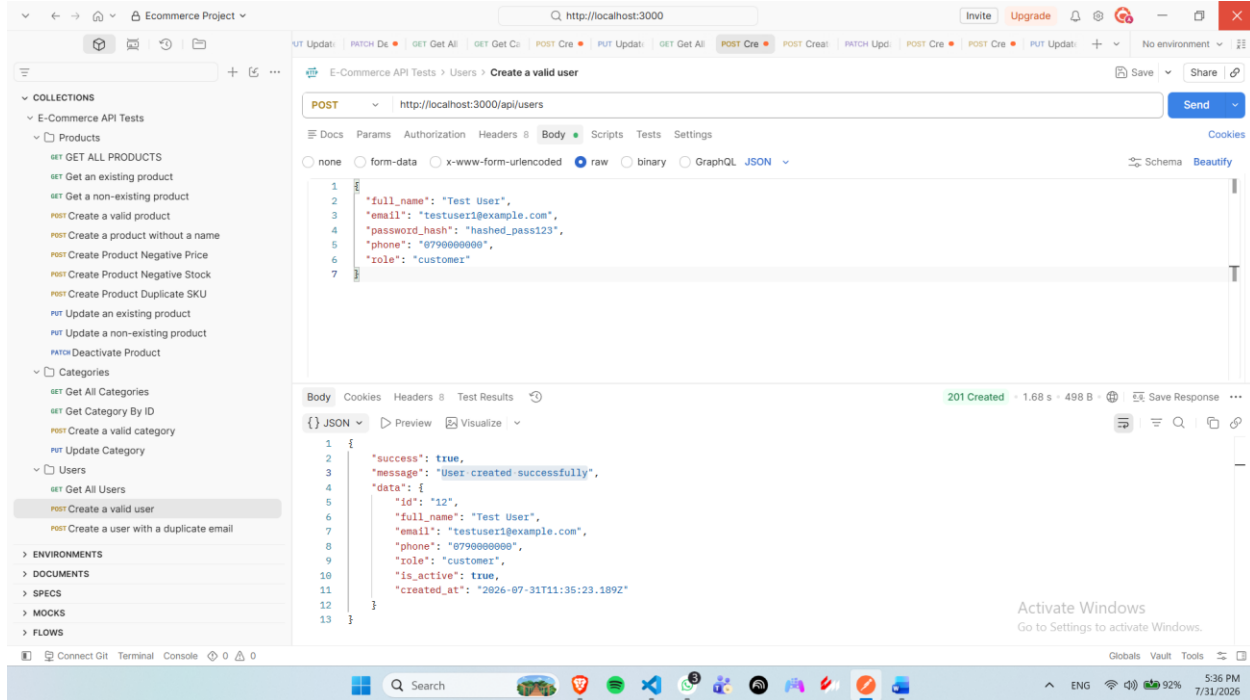

- **Method & Route:** POST /api/categories
- **Request Body:**

JSON

```
{
  "full_name": "Test User",
  "email": "testuser1@example.com",
  "password_hash": "hashed_pass123",
  "phone": "0790000000",
  "role": "customer"
}
```

- **Expected Status Code:** 201 Created
- **Actual Status Code:** 201 Created

- **Response Body:** {"success": true, "message": "User created successfully"}
- **Confirmation Statement:** Actual result (201 Created) matches expected result (201 Created).

14. Create a user with a duplicate email

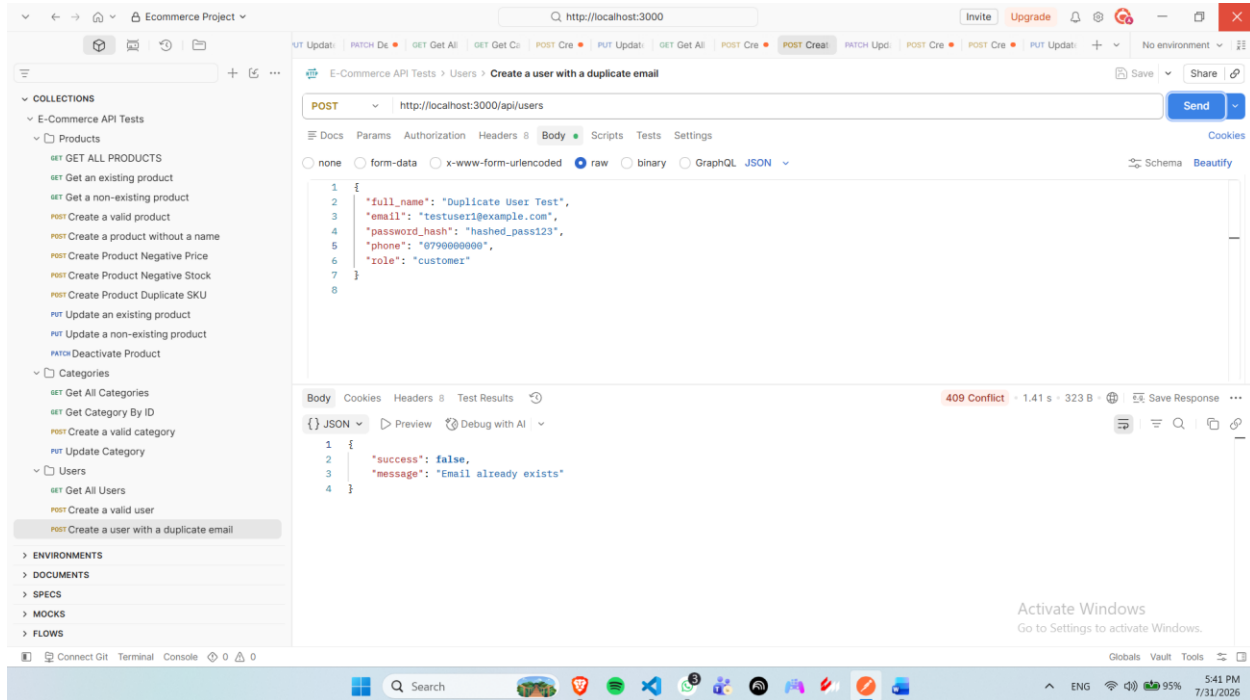

- **Method & Route:** POST /api/users
- **Request Body:**

JSON

```
{
  "full_name": "Duplicate User Test",
  "email": "testuser1@example.com",
  "password_hash": "hashed_pass123",
  "phone": "07900000000",
  "role": "customer"
}
```

- **Expected Status Code:** 409

- **Actual Status Code: 409 Conflict**
- **Response Body: {"success": false, "message": "Email already exists"}**
- **Confirmation Statement: Actual result (409 Conflict) matches expected result (409).**

15. Send incomplete JSON

- **Method & Route: POST /api/products**
- **Request Body:**

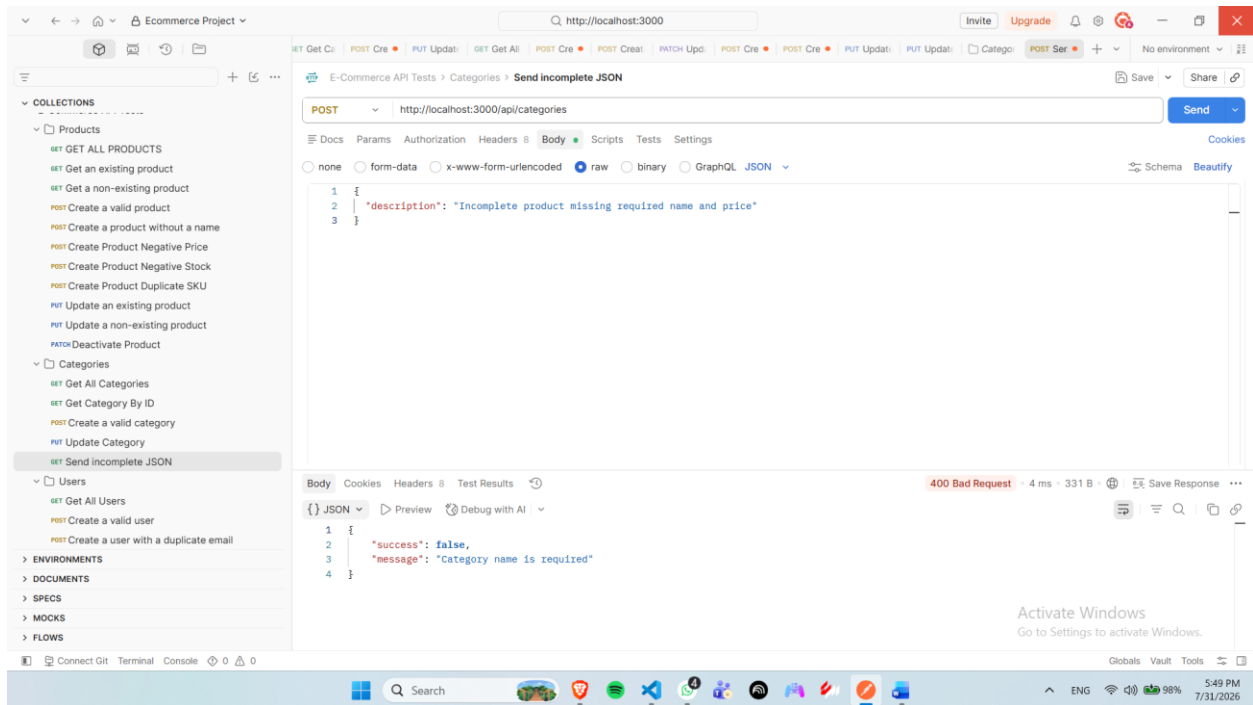

JSON

{

"description": "Incomplete product missing required name and price"

}

- **Expected Status Code: 400**
- **Actual Status Code: 400 Bad Request**
- **Confirmation Statement: Actual result (400 Bad Request) matches expected result (400).**

16. Request an unknown API route

- **Method & Route: GET /api/fake-route-does-not-exist**
- **Request Body: None**
- **Expected Status Code: 404**
- **Actual Status Code: 404 Not Found**
- **Confirmation Statement: Actual result (404 Not Found) matches expected result (404).**
